ENGINEERING & TECHNOLOGY EXPERIENCE

Advanced Software Engineer

Jun. 2022 - Sept. 2024

Neurelli (AI Startup) | neurelli.com | New Taipei, TW

- Shipped **SafeHands** — a real-time hand-detection safety system on edge hardware, now running at **Panasonic**. Built the **React.js** + **Flask** application at 150ms reaction time; cut customer setup from a full day to **30 minutes**. 1st place, [AI+ Day 2022](#).
- Built **Manufacturing Pilot** — the full **React.js** frontend and portions of the **Flask** backend for an AI manufacturing assistant. **NT\$500,000** top prize, [AI+ Day 2023](#).
- Led **NU-LPR101** — **React.js** development and **Flask** backend contributions on an edge license-plate recognition system. Cut CPU **40%** and memory **35–40%**.
- Owned [every high-fidelity prototype](#) at the company (**Figma**) and wrote its usability testing standards — doubled research insight over the prior study.

Lead Frontend Developer & Lead UX Researcher

Sept. 2020 - Aug 2021

AkadsPH (EdTech Startup) | <https://github.com/AdiSol/akadsph> | Manila, PH

- Built key surfaces of an online tutoring platform — landing, tutor payouts, [tutor requests](#), credit store — in **React.js** and **MaterialUI**. Peak 1000+ visits, 50+ users.
- Ran the remote usability testing program end to end: plan, moderation, analysis, recommendations.

Human Factors Researcher

Jan. 2019 - Mar. 2019

Qairos | qairos.asia | Manila, PH

- Conducted user analysis and product audits for agency clients including **KitKat**; findings drove web and mobile interface redesigns.

TEACHING EXPERIENCE

Computer & STEM Teacher

Aug. 2025 - July 2026

Taoyuan American School | tyas.tyc.edu.tw/ | Taoyuan, TW

- Taught 22 classes weekly across grades 1–5; built CS and STEM curricula from scratch to **California state standards**.
- Led hardware projects in **VEX GO** robotics and **Tinkercad** 3D modeling; operated **Crealty** 3D printers to produce student designs.

Part-Time Coding Teacher

Apr. 2025 - Aug. 2025

Immanuel English Academy | immanuelenglish.com | Taipei, TW

- Taught **HTML**, **CSS**, and **JavaScript** to 23 students across 5 weekly classes; consulted on the school's AI & robotics program framework.

SOFTWARE PROJECTS

Jeremiah Manzano Portfolio | [Live Site](#)

Next.js · TypeScript · Vercel · Cloudinary · client commission

- Shipped a photography and video portfolio for a paying client under a near-zero hosting budget — offloaded media to **Cloudinary**, embedded video rather than self-hosting, and used a file-based CMS to avoid database cost. Built custom before/after comparison sliders.

AnimoSched | [Github Repo](#)

React.js · MaterialUI · Figma · 115+ participants

- Built a semi-automatic course scheduling system that cut schedule creation time **43%**; led the user testing and interviews behind it.

EDUCATION

National Taiwan University of Science & Technology 國立臺灣科技大學 | M.S. Computer Science Feb. 2021 - Jan. 2022

Published in Pattern Recognition Letters 2023 | [ConCoNet: Class-Agnostic Counting with Positive and Negative Exemplars](#)

De La Salle University | B.S. Computer Science & Master's Ladderized Program

Aug. 2016 - Oct. 2020

Published in ACM CHI 2021 | [Using Boolean Satisfiability Solvers to Help Reduce Cognitive Load and Improve Decision Making when Creating Common Academic Schedules](#)

CERTIFICATIONS

Interaction Design Foundation Certification - [The Practical Guide to Usability](#), [Conducting Usability Testing](#) | Google & Coursera - [Foundations of User Experience Design](#) | Anthropic - [Introduction to Agent Skills](#) | Codecademy - [JavaScript](#), [React](#), [TypeScript](#), [Responsive Design](#), [JavaScript Unit Testing](#)
